to their interests. For example: in Joliet, State of Illinois, the woollen factory of Matteson & Bradner has nearly doubled the amount of its machinery in the last year. They now manufacture about 300 yards of cloth every day; yet, if we can believe the panie-makers. every yard brings them in debt! This manufactory is worked by steam; and the "Joliet Signal," of the 24th ult., states :

"There are now three full sets of machiset of which is kept for the purpose of carding wool for customers; three jacks, one 144 spindles, one 156, and the other 198, and eleven looms. This establishment has now on hand about 20,000 yards of cloth, ready to exchange for wool; and they will have 30,000 yards on hand by the time the new clip comes in Considering this amount, there is little doubt but that they will be able to furnish cloth for wool as fast as it may be bro't

It obtains wool from every county in the State. Another example is found in Augusta county, Virginia, where the Staunton Specta tor states that "another woollen factory is about being started on Naked creek. We understand the machinery for running 240 spindles is just at hand. Some of the operators have also arrived, and in a few months the buzz of machinery and the thumping of the looms is expected to be heard. Success attend the enterprise, say we; but what about that ruinous tariff of '46 that was going to stop all the factories and furnaces in the land?"

These and other enterprises show that individuals who understand their own interests better than Congress can, consider the present tariff sufficient for their purposes. Manufactories are rising in different portions of the South, and they are worked profitably. " The Savannah Georgian predicts that a few years hence Georgia will be a manufacturing State of no small in portance. The cotton plant has heretofore been cultivated with a reckless disregard of the waste of the soil, and the produce of the crops has not been spent in improving it. The exclusive cultivation of cotton is no longer advantageous. Various schemes, having for their object the developagitated, and a fair advance has already been was absent from town, his partners, the Mes ually directing themselves."
